

2019

THE 1st INTERNATIONAL CONFERENCE OF SOCIAL SCIENCES

“Challenges and Opportunities Social Sciences for Facing 4.0
Generation Industrial Revolution “

**Universitas Wisnuwardhana Malang
2019**

TERM OF REFERENCE (TOR)

THE 1st INTERNATIONAL CONFERENCE OF SOCIAL SCIENCES

"Challenges and Opportunities Social Sciences for Facing 4.0 Generation Industrial Revolution"

I. INTRODUCTION

Studies regarding human and their environment (social science) always to be attract to discuss. The interpretation of the social science is very wide including sociology, anthropology, psychology, economics, environment, social, politics, and history. The social science is dynamic science to discuss. It needs the renewal of study in each time period. The scope of this study could invite the researcher to find convergence between developing theories and phenomena that occur in social life.

The social sciences have developed dynamically. Alvin Toffler, American Futurologist, a person who is so intense for conducting this studies. He opened the human thinking that there is no static of life. He saw the convergence of science, capital and communication that ked to major changes. The major changes thorough social phenomena. It will create a society with a new social structure. Social change never chooses where it will occur and to whom it will occur. The changes could be occur in economic aspect, cultural aspect, political aspect and environment aspect.

The study of the social sciences will be able to keep this science from the irrelevance of time period. In this changing era, social phenomena can be assumed as problems and challenges of the times. It can be answered through comprehensive social studies. Another futurologist, John Naisbitt, he made a analysis of social and world change. He made a prediction that the society will change in line with the development of the world community. The theory that answers this issue is certainly already available. The most important need for today is try to find the critical analysis.

The views of Toffler and Naisbitt are like predictions that occur in the present era. Today global life is required to adapt to changes in all high-tech. Industrialization was developed on the basis of sophisticated artificial intelligence. Public services can be done by people, enough with technology devices. Production and distribution of goods and services achieves optimal levels of production due to technological sophistication, so that people who need them are easier to access. The term that can be used to describe such

phenomena is that the world is easier to achieve. Klaus Schwab, an economist from Germany has given named a change that based on high technology business for human life as the 4th generation industrial revolution.

In this era of change, one of the challenges is disruption. Disruption that occurs makes something that has long existed just disappear. It is in line with the scientific theories, if it is not relevant to the issue the scientific will be forgotten. Social science studies also face this reality. In this 4th generation industrial revolution, social sciences are required to develop more to face social complexity problem. The social sciences must be able to fill the corners of human life. These changes will challenge the structure of communities, institutions, and nations to determine attitudes towards this condition. Therefore, through this international conference can become a critical study forum that is able to reveal the relevance of social theory and the accompanying social phenomena.

II. Theme

This international conference has theme “Challenges and Opportunities Social Science for Facing the Generation 4.0 Industrial Revolution”.

III. TIME AND PLACE

Time of the International Conference will be held on:

Day : Saturday

Date : 12 October 2019

Time : 08.00 until the end

Place : Atria Hotel Malang

IV. OBJECTIVES

The objectives of the International Conference, such:

1. For sharing and updating studies regarding social sciences.
2. For the publication of research results in the social sciences.
3. Increasing collaboration between researchers and lecturers from various countries.

V. ACTIVITIES TARGET

1. Collaboration between Indonesian researchers and foreign researchers is established.
2. Increase international scientific publications.
3. Collaboration between Universities in Indonesia and the Ministry of Research and Technology is carried out in the framework of organizing periodic international conferences.

VI. PARTICIPANT TARGET

1. Indonesian and foreign researchers
2. University lecturers and students in Indonesia and foreign

VII. ACTIVITIES OUTPUT

All the paper that passed the selection will be published in the National Journal, proceedings and reputable International Journals.

- **Partner National Journal**

Target National Journal: Artavidya Universitas Wisnuwardhana Malang (Sinta 5), PKn UM Journal (Sinta 3)

- **Partner Collaboration International Journal**

Journal Applied Management of Brawijaya University (Sinta 2, DOAJ, Google Scholar), Journal of Law Brawijaya University (Sinta 2, DOAJ, Google Scholar, Indonesian Publication Index).

VIII. PAPER SELECTION MECHANISM

Paper submitted by each participant will be selected by the editor of the board for selection related to in line content of each paper with a predetermined theme. The timeline for receiving paper is as follows:

- | | |
|-------------------------------------|----------------------|
| a. Preparation | : March - April 2019 |
| b. Publication | : June - August 2019 |
| c. Abstract Acceptance | : June - August 2019 |
| d. Abstract Acceptance Announcement | : 30 August 2019 |
| e. Collection of Full Paper | : September 30, 2019 |

- f. Conference : 12 October 2019
- g. Publication Results : The Middle of 2020

IX. Speaker

- a. Prof. Peter Carey, Oxford University.
- b. Assoc. Prof. Dr. Mohd Rizal Palil, Universiti Kebangsaan Malaysia.
- c. Dr. Michelle Miller, National University of Singapore
- d. Prof. Dr. Suko Wiyono, Universitas Wisnuwardhana Malang
- e. Syamsul Bahcri, Ph.D, Universitas Negeri Malang
